

VEGA LITE COMPACT

4000 lumen cabled LED work light with outlet

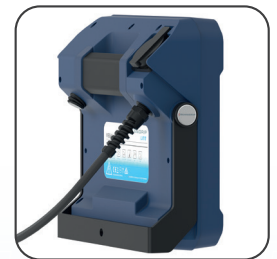

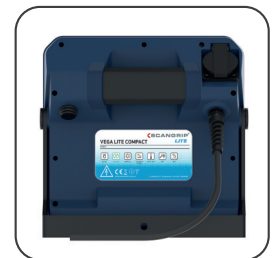

VEGA LITE COMPACT is a part of a range of three innovative, sturdy, lightweight LED floodlights for the professional market, which provides high quality illumination to a variety of indoor and outdoor areas.

Compared to the previous version, the light output of the upgraded VEGA LITE COMPACT has been increased from 2600 lumen to 4000 lumen. The powerful LEDs provide a diffused and pleasant, non-blinding, uniform work light, with a large dispersion. The upgraded version is also supplied with one power outlet on the backside that makes it possible to add another lamp or other equipment without the use of extra cabling – quick and easy.

With a great design, performance and durability, the new VEGA LITE COMPACT offers a strong light output and high quality at an attractive price.

The robust housing of the VEGA LITE COMPACT is made of a highly shock-resistant plastic material, perfect for a working environment. Since the LEDs do not produce heat, there is no fire hazard when using the floodlight.

VEGA LITE COMPACT comes with an integrated carrying handle and a stand for direct mounting of the lamp on the SCANGRIP TRIPOD. The cable length has been reduced from 5m to 3m, which is more practical during the working day.
